- Colombo, Sri Lanka
- linkedin.com/in/kosala-d-athapaththu
- github.com/kosaladathapththu

LANGUAGES

- Sinhala - Native
- English - Working Proficiency

AREAS OF INTEREST

- Frontend Development
- Full-Stack Development
- IoT Dashboards
- SCADA / Monitoring
- Database Systems
- API Integration

KEY STRENGTHS

- Frontend UI Development
- REST API Integration
- Node-RED Data Flow Handling
- ThingsBoard Dashboard Work
- Clean Coding & Problem Solving

PROFILE

Software Engineering undergraduate and software developer with hands-on experience in frontend development, full-stack web applications, IoT dashboards, Node-RED API input flows, and ThingsBoard visualization work. I have practical experience developing real business systems and renewable energy monitoring dashboards for solar, wind, and hydro plant environments. I am focused on building clean, useful, and client-ready software solutions.

EDUCATIONAL QUALIFICATIONS

- Higher National Diploma in Software Engineering** 2024 - Present
NIBM - National Institute of Business Management
- Diploma in Software Engineering** 2023 - 2024
NIBM - National Institute of Business Management
- G.C.E. Advanced Level - Physical Science Stream** 2020
Sri Sumangala National College - Wariyapola

WORK EXPERIENCE

- Software Developer (Intern)** May 2026 - Present
SLT-Mobitel, Colombo
 - Develop frontend dashboards and software interfaces for business and monitoring systems.
 - Work with React-based UI development, API integration, and deployment-ready frontend builds.
 - Support data visualization workflows using Node-RED, ThingsBoard, and live monitoring concepts.

TECHNICAL SKILLS

Languages	Java, PHP, C#, SQL / PL-SQL, JavaScript, Python, C++
Frontend	React, HTML5, CSS3, JavaScript, Responsive UI Design
Backend	Spring Boot, Node.js, PHP, REST API Development
Databases	Oracle, MySQL, SQLite, Firebase, MongoDB, SQL Server
IoT / Monitoring	ThingsBoard, Node-RED, MQTT Concepts, Dashboard Visualization
Tools	Git, GitHub, Postman, VS Code, XAMPP, Laragon, Arduino IDE

CERTIFICATIONS

- Oracle Data Platform 2025 Certified Foundations Associate - Oracle
- Developing Microsoft Azure Solutions - Microsoft Learn
- HackerRank SQL (Basic) and Java (Basic)
- Agile Project Management Foundation - HP LIFE

ADDITIONAL EXPERIENCE

- Built and deployed live frontend projects for business use.
- Worked with Node-RED data flows for renewable energy monitoring use cases.
- Maintained GitHub repositories and used version control for academic and client projects.
- Created dashboard concepts for solar, wind, and hydro power plant visualization.

MAIN COMPETENCIES

- React Frontend Development
- Business System Development
- Renewable Energy Dashboards
- API and Data Integration
- Database Design
- IoT System Integration

LIVE WORK

AC Service Management System

Live frontend system developed for Supun Group of Companies to support AC service management workflows.

DECLARATION

I hereby declare that all information provided in this curriculum vitae is true and accurate to the best of my knowledge.

PROJECTS

Ceylex Renewable Energy Frontend Dashboards

React | Node-RED API Input | ThingsBoard | Solar, Wind & Hydro Plant Dashboards

- Developed frontend dashboard views for Ceylex renewable energy monitoring projects.
- Worked on solar plant dashboards, wind power plant digital twin / dashboard work, and hydro power plant dashboard concepts under the same Ceylex project scope.
- Integrated plant data inputs from Node-RED APIs and visualized key metrics such as plant status, active power, energy values, telemetry, turbine/unit states, and KPI values.
- Worked with ThingsBoard dashboards, live telemetry concepts, and animated visualization ideas for monitoring systems.

Solar Soiling Detection ML Project

React Frontend | Flask Backend | Machine Learning Workflow

- Developed frontend interfaces for solar soiling / accuracy checking ML workflow.
- Connected frontend with Flask backend APIs to support prediction and result display.

PizzaMania Android Application

Java | Firebase | SQLite | Google Maps API

github.com/kosaladathapaththu/PizzaMania

- Built an Android food ordering application with cart, branch, and order management features.
- Used Firebase, SQLite, and Google Maps API for data handling and location-based features.

Hotel Management System

Spring Boot | React | MySQL | Microservices

github.com/kosaladathapaththu/Hotel-Management-System

- Designed a microservice-based hotel management system with room and booking workflows.
- Built clean REST API communication between services and frontend UI.

AC Service Management System

React | Google Sheets Database | Google Apps Script | Email Reminders | Business Workflow System

- Developed a client-ready AC service management frontend for Supun Group of Companies.
- Used Google Sheets as the database for service records, customer details, job status, and order/service tracking.
- Implemented data synchronization workflows between the frontend and Google Sheets using Google Apps Script APIs.
- Supported automated reminder email workflows for pending services, follow-ups, and service-related notifications.
- Handled operational workflow needs such as record management, status updates, search, filtering, and client-side data handling.

Centination Website

HTML | CSS | JavaScript | Live Deployment

centination.com

github.com/kosaladathapaththu/Centination

- Developed and deployed a responsive live website with UI/UX-focused page layouts.
- Handled frontend design, performance improvements, and domain integration.

Personal Financial Management System

PHP | Oracle | SQLite | PL/SQL | Cloud Sync

github.com/kosaladathapaththu/Personal-Financial-System

- Developed budgeting and reporting features with a normalized database structure.
- Used PL/SQL procedures and triggers for automation and data handling.

Salvation Army Girls' Hostel Management System

PHP | MySQL | HTML | CSS | JavaScript

github.com/kosaladathapaththu/Hostel-Management-System

- Developed role-based modules for admin, matron, residents, employees, suppliers, and guests.
- Implemented CRUD workflows, reports, bookings, transactions, inventory, and supplier orders.
